Zusammenfassung von JP 6258116 (A)

PURPOSE:To obtain an excellent insecticidal composition capable of keeping the insecticidal effect over a long period and free from problems such as discoloration of wood. CONSTITUTION:The insecticidal composition contains microcapsules containing a >=8C non-aromatic ester compound and an active component comprising a carbamate-type insecticidal compound such as fenobucarb, propoxur, xylylcarb, metolcarb and isoprocarb. The composition is especially effective for the control of wood vermin and disagreeable vermin at the wood-using part such as outer wall of house.
